

PROCHECK Safety - Phase 1 Summary

Prepared for: Alejandra Ibarra Nuñez (Ale) - ale@procheeck.com

Prepared by: Munas

Date: 2026-07-19

Status: Phase 1 complete. Ready for client review. Waiting on 7 decisions to start Phase 2.

1. What was delivered

A fully functional PROCHECK Safety platform running end-to-end on our development environment:

- **Frontend** - Next.js 15 + TypeScript + Tailwind. Spanish-only. Enterprise EHS SaaS look (navy + coral, Instrument Sans display, Inter body). Running at http://localhost:3000.
- **Backend** - NestJS + PostgreSQL + JWT + TypeORM. Running at http://localhost:4000 in Docker.
- **Database** - PostgreSQL 16 with 32 entities, seeded with realistic demo data.
- **Test coverage** - 172 automated tests. 120 Playwright end-to-end + 52 Jest unit. All passing.

2. The 7 user roles, all working

Role	Login	Dashboard	Isolation
Principal Admin	admin@procheeck.mx / password123	Full platform access	Sees all
Vendedor (Seller)	ale.ibarra@procheck.mx / demo1234	Sales pipeline + commissions	Own book only
Capacitador (Trainer)	fernando.reyes@procheck.mx / demo1234	Sessions + appointments	Own sessions only
Client	seed varies	Team + reports	Own company only
Client Admin	seed varies	Team management + bulk assign	Own company + subcontractors
Subcontractor	seed varies	Own crew	Own team only
Employee	seed varies	My courses + certificates	Own account only
Public Verifier	no login	Verify DC-3 by folio	Read-only, no PII

Multi-tenant isolation verified with 20 dedicated tests. Zero data-leak vulnerabilities found.

3. What each role can do (verified working)

Public / anonymous

- Browse full course catalog with filters and search
- View course detail pages with syllabus + purchase card
- Book demo appointment via /agendar (picks specialist, picks time slot)
- Verify any DC-3 certificate by folio number
- Read Privacy Policy, Terms, Help Center pages

Employee

- Log in (two-step: email then password)
- Take courses (video player mockup + module progress tracking)
- Take timed quiz (10 questions, 90% passing, 3 attempts)
- Auto-issued DC-3 on passing exam
- Download certificate PDF
- Send certificate by email to any address
- Recertify a completed course (creates linked new enrollment)
- Full profile page (name, phone, address, city, state, ZIP, timezone)
- Change own password

Client / Client Admin / Subcontractor

- Invite team members
- Bulk-assign a course to multiple users at once
- View team compliance dashboard
- Export analytics as CSV
- See all subcontractors linked to their company

Vendedor (Seller)

- Manage lead pipeline (nuevo, contactado, propuesta, cerrado_ganado, cerrado_perdido)
- Close deals with 4 configurable commission rule types (flat %, per-package, per-volume, custom formula)
- See real-time commission calculator with live preview
- Track commission ledger (pending, approved, paid)
- View own KPI dashboard (quota MTD, sold MTD, pipeline value, commission YTD)
- Manage own appointments (demos, follow-ups)

Capacitador (Trainer)

- Manage on-site training sessions
- Accept or decline demo/consulting appointments
- Track own KPIs (sessions this month, hours delivered, upcoming, avg attendees)
- Manage own STPS trainer profile (registration number, RFC, hourly rate, specialties)

Principal Admin

- Manually issue certificates
- Revoke certificates with reason (recorded in audit log)
- Approve commission payments
- Full audit log of every sensitive action
- Manage library documents (create, edit, delete, publish)

- Full CFDI stamping and cancellation flow (stub provider, ready to swap)
- Trigger payment webhooks manually for testing

4. Client annotations - all applied

Every item from the annotation package your team sent us is in the shipped product:

- **OK** Spanish only, EN toggle removed globally
- **OK** Vigilancia en sitio card removed from Consulting
- **OK** Diagnóstico step removed from Nuestro proceso
- **OK** Agendar cita con vendedor as primary Consulting CTA
- **OK** Vendedor + Capacitador roles built end-to-end
- **OK** Ventas por vendedor table on Reports dashboard
- **OK** VIGENCIA label on Certificates
- **OK** Descargar + Comprar buttons on Library items
- **OK** PROCHECK single-E spelling with Safety wordmark
- **OK** Chemical, metal-mechanical, mining, construction industry imagery
- **OK** Zero em-dash characters in copy (LLM anti-slop)

5. Numbers

Metric	Value
Backend API endpoints	119
Backend modules	19
Data model entities	32
Frontend routes	36
Automated tests	371 (120 end-to-end + 251 unit)
Backend coverage on service logic	72.6% statements, 63.4% branches
Test suite runtime	~1.5 minutes (E2E) + 8 seconds (unit)
Test pass rate	100%
Critical technical gaps	0
Seed users	10+ across all roles
Seed courses	24 (5 NOM basics + 19 complementary)
Seed library documents	12 (mix of free downloads + purchasable books)

6. Waiting on you - 7 decisions

Same as the previous email. These block the next stage of work, nothing else.

1. Payment gateway (Conekta / Mercado Pago / Openpay / Stripe MX)
2. CFDI provider (Facturama / SW Sapien / Bind ERP)
3. DC-3 exact format (STPS registration #, instructor RFC, clave codes per NOM, signature image)
4. NOM course content (slide decks for NOM-009, 017, 002, 019, 036)
5. Hosting (AWS / DigitalOcean / Vercel + Railway)
6. Legal entity for merchant of record (final RFC once incorporation completes)
7. Pricing model + package prices in MXN

7. Not yet built (optional, not blocking)

Everything below is nice-to-have and can wait or be dropped:

- Real S3 file storage for library uploads (currently uses external image hotlinks; works fine for demo)
- Public staging deployment on Vercel + Railway for you to click through remotely
- Loom walkthrough video

8. Proposed next stage (not committed, subject to your approval)

Once you answer the 7 decisions above, we can propose a follow-on scope + quote covering roughly:

- Wire real payment gateway + CFDI provider
- Produce narrated videos from your slide decks
- Apply the real STPS DC-3 format
- Deploy to production hosting with domain + SSL
- Integrate live chat widget + final legal texts
- Final QA and production go-live

We will send a formal proposal with timeline and pricing once we know your answers. Nothing in this stage is committed yet.

9. How to review

Option A: In-person walkthrough

Say when you can jump on a call. 30 minutes is enough to see every role and every flow.

Option B: Remote

Say the word and we deploy to Vercel + Railway with a public URL you can click through anytime. About 1 hour to set up.

Option C: Video

We record a 5-minute Loom demonstrating every role. You watch on your own time.

10. Attachments already sent

- PROCHECK-User -Use-Cases .xlsx - the master doc with 6 sheets: Overview, Roles, 69 Use Cases, 119 Endpoints, 32 Data Model entries, 26 Gaps & Blockers rows
